

# MULTILINE HEADING

## 1 TEXT TYPESETTING

We begin our 📺 story 🌐 in New York 🗽. There once was a girl 🧒 known by 📷 everyone 💜 and no one. Her ❤️ heart belonged to *someone* 🧑 who couldn't stay 🛫💔. They loved each other ❄️ recklessly 🌲🔥📺. They paid the price 😞. She danced 🕺 to forget him 🎭. He drove 🚗 past her street every night 🌙. She made friends 👯 and enemies ⚡💣🔪. He only saw her 🧒 in his dreams 🧠📺. Then one day he came back 🕒!!! 🕒🕒🕒 Timing is a funny thing 😊. And everyone 📺📺📺 was watching 📺📺📺. SHE LOST HIM 🧒 BUT SHE FOUND HERSELF 🧒🧒🧒 AND SOMEHOW THAT WAS EVERYTHING 😊🧒.

$$\int_{13}^{22+\frac{e}{2}} x^2 \, dx \quad \int_{13}^{22+\frac{e}{2}} x^2 \, dx \quad \sum_{n=1}^{13} n^2 + n \quad \prod_{n=1}^{13} n$$
$$\sqrt[3]{U} + \sqrt[3]{\frac{x}{n}} + \sqrt[3]{\frac{\int_{13}^{22+\frac{e}{2}}}{n}} + \sqrt[3]{\frac{abc + \frac{e}{n}}{\int_{13}^{22+\frac{e}{2}}}}$$
$$\frac{a + \frac{e}{n} + \sqrt{2}}{22+\frac{e}{2}} \quad \frac{a + \frac{e}{n}}{\int_{13}^{22+\frac{e}{2}}} \quad \frac{a + \frac{e}{n}}{\frac{e}{n}} \quad \frac{a + \frac{e}{n}}{n}$$
$$a - \int_{13}^{22+\frac{e}{2}}$$

“I love you” doesn’t count after goodbye. Won’t stop ’till it’s over.

| COUNTRY       | GDP<br>TRILLIONS USD | POPULATION<br>MILLIONS |
|---------------|----------------------|------------------------|
| United States | 17.914               | 80.62                  |
| Britain       | 2.678                | 64.1                   |
| France        | 2.806                | 66.03                  |
| Germany       | 3.73                 | 80.62                  |

Gross domestic product by nation.

## 2 COUNTING TESTS

### 2.1 LEVEL 3 HEADING

Non counting paragraph

### 2.2 LEVEL 3 HEADING

### 2.3 LEVEL 3 HEADING

#### 2.3.1 LEVEL 4 HEADING

#### 2.3.2 LEVEL 4 HEADING

### 2.4 LEVEL 3 HEADING

#### 2.4.1 LEVEL 4 HEADING

## 3 LEVEL 2 HEADING

### 3.0.1 LEVEL 4 HEADING

### 3.0.2 LEVEL 4 HEADING

## 4 MOVIE SCRIPT RECIPE

Catastrophe: Why did you take the plans for the Heisenberg device? You knew Lord Roy would use it for evil.

Arsyn: I’m not just another member of your squad, Cat.

Catastrophe: And so you kick your best friend out a thirteen-story window?

Arsyn: I am a superhero and you treated me like a sidekick.

Catastrophe: That was Welvin’s decision, not mine.

Arsyn: I don’t like Lord Roy any more than you do. But I will never work for Welvin Da Great again.

Catastrophe: Roy will destroy London!

Arsyn: Don’t you think I know that? She sent me to patrol the city as it burns. I have my own squad now.

Catastrophe: But we had ... Squad Goals, Arsyn. *Squad Goals.*

# 5 NUMBERED LIST

## 5.1 LEVEL 3 HEADING

These are some list items:

- 1. Item one.
  - 2. Item two
  - 3. Multiline list item (item 3) la la la, la la la.  
This is, my SNL monologue.
  - 4. Item four.
- 1. The list can restart using the firstchild style.
  - 2. And recount.

# 6 HISTOGRAM TESTING

Standard cumulative histogram.

Logarithmic histogram.

Signed histogram.

Double-sided histogram

Standard scatterplot

Logarithmic scatterplot

Bi-logarithmic scatterplot with negative flooring

Logarithmic scatterplot with floored curve overlays

Riemann sums.

Functional/parametric plot

Bubble plot

Slope field plot

3D scatterplot

**US energy consumption by type**

#### **SVG rendering**

*A plant cell in the process of cell division. SVG rendering depends on the CairoSVG library.*

**Meredith Grey Swift** is the older of Taylor Swift's two Scottish Fold cats. Her namesake is the *Grey's Anatomy* character Meredith Grey. She has a reputation for being rather grouchy and indifferent, in some contrast to her sister of the same breed, **Olivia Benson Swift**, named for the detective in the television series *Law and Order*.

#### **Bitmap (PNG, JPEG) tests 1, 2: Meredith and Olivia**

*Photographs of Meredith and Olivia from Taylor's instagram. Olivia has since grown and accordingly soured in demeanor.*
