

# WE BEGIN OUR STORY IN NEW YORK.

There once was a girl known by  
everyone *and*

no one. Her heart belonged to someone who  
couldn't stay. They loved each other reck-  
lessly. They paid the price. She danced to  
forget him. He drove past her *street every*  
*night. She made friends and enemies. **She***  
***only saw him in his dreams.*** Then one day he  
came back. Timing is a funny thing. But ev-  
eryone was watching. She lost him but she  
found herself and somehow that was every-  
thing.

1.  $x^2 + 2x - 3$
2.  $A_n = 6n + A_{n-1} + 1$
3.  $\int_{13}^x x + 2 \, dx$
